HEALTHCARE

LIVIN' TULSA
Move Your Career and Life Forward

ADVANCING MEDICINE. ELEVATING LIVES.

Tulsa combines world-class healthcare with an exceptional quality of life. From nationally recognized cardiovascular care and Level I trauma services to advanced cancer treatment, neuroscience research, and medical education, the region offers a growing healthcare ecosystem.

Saint Francis Health System employs more than 12,000 people, while OSU Medical Center is the nation's largest single-site osteopathic hospital. Tulsa is also expanding access to care with a new 58-bed VA hospital, eastern Oklahoma's only Comprehensive Stroke Center, and specialized burn care at Hillcrest Medical Center.

Specialized Care with National Reach

Tulsa delivers advanced care across several key specialties.

HEART CARE:

Heart Care: Oklahoma Heart Institute's TAVR program ranks No. 19 nationally and No. 1 in Oklahoma, while pioneering next-generation cardiac technology.

CANCER CARE:

OU Health Stephenson Cancer Center, Oklahoma's only NCI-designated cancer center, is expanding to Tulsa with a 176,000-square-foot facility planned for 2028.

PEDIATRIC MEDICINE:

Saint Francis Children's Hospital offers comprehensive specialty care with approximately 100 pediatricians and 65 pediatric subspecialists.

TRAUMA CARE:

Two Level I Trauma Centers at Ascension St. John and Saint Francis Hospital provide advanced, around-the-clock emergency care.

Where Care, Research, and Education Connect

Tulsa is advancing medicine through research, innovation, and education. The Laureate Institute for Brain Research features 27,000 square feet of dedicated neuroscience research space and the world's first research lab studying floatation therapy's effects on mental health.

OSU Center for Health Sciences strengthens the region's healthcare workforce through 15 residency and six fellowship programs, preparing the next generation of medical professionals.
